Notes

If your Acronis True Image Subscription lapses, you have 30 days to access to any data stored in Acronis Cloud Storage. You can recover any local backups indefinitely. You cannot make any new backups and all other features are disabled.

¹ Studies by two independent testing labs (MRG Effitas and AV-Test Institute) rated Acronis as the fastest backup and recover available - on average twice as fast, and in some cases more than 10x as fast as the competition.

² In AV-Test Institute's study, Acronis achieved the highest score of all competitors for usability, describing the interface as “nice and modern” and calling setting changes and interactions “easy and self-explanatory.”

³ When MRG Effitas tested eight consumer backup products side-by-side, Acronis was the only solution able to protect backups from every ransomware family tested. They wrote, “The other solutions have basically zero backup protection when it comes to ransomware.”
